Principal’s Piece.—Garry Goltz

Titration Competition
Two senior Chemistry groups recently competed in the regional Titration Competition. Both teams did extremely well with one team coming in second and advancing to the National Final. These teams spend many hours with teacher Joanne Cooper and should be proud of their results. Well done!

Recognition parade
What an outstanding morning! As my first experience at a Recognition Parade, I was thoroughly impressed with the focus on recognising outstanding effort and excellence. It highlights Toolooa State High Schools commitment to continual improvement. It was especially pleasing to see the number of parents in attendance, as well as a wonderful performance from our year 9 girls dance class. Our Junior Leaders did a great job running the morning, ably supported by Mr Bryan Townsend. I would like to congratulate all award recipients and commend them on their commitment to their education.

Japanese Trip
The value that this type of program brings to a school is hard to measure but looking at the faces of our host students and their Japanese guests spoke volumes. It has been an absolute pleasure to be involved in this program. The coordination of our key staff, Mrs Bonnie Assman and Petrina Zagami, and the support and involvement of a range of additional staff enabled a very smooth program. It is also important to recognise our host families for providing a real Australian experience for our visitors.

NRG Success
The recent Queensland Training Awards recognised the quality of the EQIP Engineering Skills Centre (EESC) at our off campus program at NRG and the quality of the students attending the program. Jacob Jones, a student from Tannum Sands involved in the EESC program took out the Vocational Student of the Year award. This is an outstanding result for Jacob and the Skills Centre program. Congratulations!

Student Equipment requirements
Just a quick reminder to our parents about the equipment that our students are required to bring to school each and every day.

All students will require their school diary and the following:

- An exercise book for each subject
- Blue or black pen
- Red pen
- Ruler
- Lead pencil and eraser
- Calculator
- Scissors and glue

We would appreciate our parents support in ensuring that our students have their required equipment each day. We will be working with our students and teachers to ensure these expectations are met.

NAPLAN information
The results from the 2014 NAPLAN Literacy and Numeracy testing has begun coming through to our schools. In the upcoming weeks we will provide some greater detail about our students and school performance however early information has been mostly positive. We will keep our parents and community informed.

Explicit Instruction
One of the key requirements of the Explicit Instruction process is the need for the teacher to demonstrate the skill/action to be learned; followed by completion of the skill/action with teacher guidance and student input; and finally students completing the skill independently. This provides a clear sequence of steps:

I Do – Teacher demonstration
We Do – guided practice between student and teacher
You Do – students complete the skill/action independently

Most of parents will recognise this as the style of learning that most of us experienced in our time at school. This reinforces the notion that good teaching will always be good teaching!

Reminders

Attendance – every day matters. Is your child at school?
Uniform – we have clear expectations about uniform. Is your child in uniform?
Diaries – our student’s diaries are an important tool in our students’ education. Is your child prepared for school?
From the Deputy’s Desk—Danielle Willard

What a fantastic way to start the week. The recognition parade enabled the school to celebrate many of our students’ achievements from Semester 1. It was fantastic to see so many students receive gold awards for their academic success. Likewise we were able to celebrate the success of students in sporting and musical endeavours.

It is also fantastic to see such great support from our school P and C. They presented cheques to Cara Pascoe, Jasmin Dew, Kaitlyn Read, Sabine Mazlin, Brandon Vowles Edwards, Melissa Ndabanengi and Jasmin Stewart.

The cheques were to support students in representative sports such as gymnastics, music programs and also a ‘Brain Bee’ competition.

The support from our P and C is greatly appreciated and it enables students to participate in a variety of extra-curricula events.

Cheers
Mrs Danielle Willard

Billy Blood Drop, Drops Into Toolooa

Monday 18th August saw Billy blood drop call into Toolooa to thank the students and staff who have given up their time and blood to support such a worthy cause.

A total of 177 lives have been saved as a result of peoples generous donations.

If you are interested in becoming a blood donor and are over 16 see Mrs Read in science or one of the Youth Blood ambassadors.
Good Guidance with Silke Hetherington

All The Latest Apps You Need To Know About

Cyber safety is a major concern for parents. Most of us are familiar with ‘Facebook’, but there are so many other apps out there. One of the biggest problems that parents face is keeping up with what social media apps your children might be using. I came across this information recently and thought it might be a valuable resource to share. It might be worth asking your children what apps they’re using/familiar with.

**Ask.fm**  
Age requirement 13+  
Is a Latvia based social networking site, users can ask each other questions with the option of anonymity which most users do. Because of the anonymity it encourages nasty questions and can be used to bully and harass, there have been several suicides overseas linked to the site.

**Instagram**  
Age requirements 13  
Instagram is an online photo/video sharing site; users can choose to share privately. If location services are set ‘on’ your device then the GPS position of where you were when you took the picture is easily obtained. Is used for cyberbullying, ensure full privacy settings are enabled.

**KiK**  
Age restriction 17+ No 1 app for Predators  
KiK is a messaging app that is free, it is the number one app causing problems in schools at the moment as younger kids are using it behind their parents back so there is a large number of young and vulnerable kids and is a haven for online predators. Police around the world regularly warn about this one.

**Omegle**  
Age restriction 17+  
Omegle is a free online chat website that allows users to communicate with strangers without registering. The service randomly pairs users in 1:1 chat anonymously and has extensive sex chat/video and you can guess the rest.

**Qooh.me**  
Age restriction 13+  
Qooh.me is a social site that allows people to find you interesting to ask you anonymous questions so they can get to know you better. Best to avoid as anonymity causes problems.

**meSpring.me**  
Age requirement 13+  
Spring me is the new name for ask me anything site. Has been linked to several cases of youth suicide. Avoid.

**Snapchat**  
Age restrictions 13+  
Snapchat is a photo messaging app which allows users to take photos, record videos, add text and drawings and send them to a controlled group of recipient’s, this image is displayed for a certain period of time then is hidden from the users screen, but it is retrievable if required. Snapchat is fun and harmless is used appropriately but when teens use it for naked or semi naked pictures it can cause serious problems for those involved.

**Tumblr**  
Age restriction 13+  
Tumblr is a blogging site that allows you to post, comment and share your thoughts about anything that interests you. You can follow other users to see what they are posting about. The site encourages creativity and allows others with similar interests to connect it is now known as a haven for those who are depressed, suicidal or self-harming. Use of this site needs to be monitored closely.

Apps from overseas to be aware of:

**Confide**  
Age restriction 13+  
Is a messaging app similar to snapchat, where the message disappears? This encourages people to ‘go off the record’ and ‘say what you like’ as the message is confidential, which it isn’t. This site can be used for cyberbullying as they think they won’t get caught.

**Popcorn chat**  
Allows users to privately chat with people within a 1.6km radius, its purpose is to allow you to discover who is around you, predator alert! The iTunes app encourages students to use it at school when they are board.

Taken from Cyber safety solutions- GenerationNEXT
QCS Test

All OP-eligible Year 12 students are busy preparing for the Test which is Tuesday 2nd and Wednesday 3rd September.

EQIP

The closing date for 2015 EQIP applications has been extended until Friday 19th September (the last day of Term 3).

Year 11 Practice QCS Test

The Year 11 Practice QCS Test will occur on Thursday 18th and Friday 19th September, which is Week Ten of this term. It is incredibly important that all OP-eligible students ensure they are present for the full two days of the Practice QCS Test so that they start to become very familiar with the test and the test procedures in preparation for the test next year. Additionally, the Practice QCS Test will be professionally marked, with every student receiving feedback aimed at identifying strengths and weaknesses, and giving them a clear indication of their expected performance on the QCS Test.

Supporting Women Scholarships

The Supporting Women Scholarships program is a Queensland Government initiative which provides real opportunities for Queensland women. In 2013-14, 120 women across the State commenced studying with the assistance of a Supporting Women Scholarship.

The Department of Education, Training and Employment is once again offering scholarships to women who are interested in pursuing study and employment in traditionally male dominated fields and skill shortage areas. Scholarships of up to $20,000 are available for study from certificate IV level through to postgraduate.

The third Supporting Women Scholarships application round is scheduled to open on 7 August 2014, for study commencing in 2015, and will close at 2pm on 10 October 2014. Further information about the Supporting Women Scholarship program is available online at www.supportingwomen.qld.gov.au.

The 2014 Toolooa Athletics Carnival was held on Friday of week one this term and fun was had by all. Like always the day was filled with an array of careport colours and many students even dressed up in costumes to make the day more fun. Some of the highlights were the hordes of year 12’s dressed up as tennis players and also a giant red inflatable man. Congratulations needs to go to all students and sports captains who took part during the carnival and participated in the lead-up field events during the last week of term. The level of school spirit and morale was excellent as was the war cries and chants that could be heard all day.

This year Keppel proved too strong against some good competition from all the other carports taking out the competition with 2790 points.

Individual Age Champions are as follows:

Overall Results
- 1st. Keppel 2790
- 2nd. Curtis 2516
- 3rd. Elliot 2033
- 4th. Heron 1842

Many thanks go out to all staff that helped out on the day with marshalling, recording, and officiating. Without this dedication an event such as this can never take place. Also huge thanks to the Mr Scott Mercer for his dedication to and assistance in oval preparation and maintenance.

Interschool Athletics

The students who placed 1st and 2nd in each event then made the school team to participate in the Port Curtis Trials at Chanel College during the Thursday and Friday of week three of this term. All students who participated in these trials need to be congratulated on their excellent behaviour, hard work and effort during these trials.

Many students performed well during the trials but perhaps the standout for the day was Ally Ware who broke the 3000m record.

Congratulations goes to the following students who made the PC team:
- Ryan Neale, Lyncoln Rebel, Ken Sagat, Brad Howard, Ally Ware, Georgia Muir, Alex Smith, Tenielle Spencer, Christian Hopkins, Keana Truskett, Chyanne Downing, Pieter De Wet, Janaya Ray, Maddy McPhail, Logan Parrish, Godfrey Henderson, Brad Preston and Joseph Bannan.

Once again all staff and parents need to be thanked for making the day run so smoothly.

Schools Cup Volleyball

Also in other sports news Mr Nathan Elvery and Mrs Laura Kistemaker took a group of our senior students to the Senior Schools Cup Volleyball Competition in Toowoomba. This is a major competition on the volleyball circuit with schools from all around the state taking part.

Both the boys and girls teams played very well throughout the tournament and I am sure they have gathered many valuable skills for their future in volleyball.

Throughout the competition both the boys and girls teams played some hard fought matches with the boys placing 8th and the girls placing 13th in their respective divisions.

Once again a huge congratulations needs to go out to all of the students who participated for their effort and outstanding sportsmanship throughout the competition. Also a big thank you needs to go to Mr Elvery and Mrs Kistemaker for their hard work before and during the competition.
Toolooa Teams Awarded 2nd Place and 6th Place in CQ Region Titration Competition

The Royal Australian Chemical Institute (RACI) Australian National Chemical Analysis (Titration) Competition has been running since 1984. Acid-base titration is a method in chemistry that allows quantitative analysis of the concentration of an unknown acid or base solution. This technique is used for chemical analysis in nearly every working laboratory.

The competition has two stages – the first round involves Regional Competitions in each state. The teams that place 1st, 2nd or 3rd in the Regional Competition are then invited to take part in the National Finals.

This year there were 20 teams competing in the Central Queensland competition, from as far south as Bundaberg and as far north as Yeppoon.

Toolooa State High School entered two teams in the regional competition which took place on Thursday the 7th of August. Team 1 (consisting of Kahla Button, Zoe Frazer and Kaitlyn Read) obtained an excellent result and placed 2nd in the regional competition.

Team 2 (consisting of Andrea Ispanavic, Ksenia Metilkiva and Shan Lakshmanan) were not far behind them, taking out 6th place in the regional competition.

As Team 1 finished in a top 3 position, the members of Team 1 have now been invited to take place in the National Finals which will take place in October.

There are 12 teams from four different Queensland regions that are Queensland finalists in the National Competition. Each team of finalists across the nation competes in their local area on various dates in October with the support of their local university. These teams compete against all the finalists for every other Australian state and territory.

The National Finals are even more demanding than the regional competition. Students have just two hours to complete the complicated analysis and calculations. Each year only the best teams in the Finals achieve remarkable accuracy in this quite difficult exercise. We would like to wish the members of Team 1 the best of luck in the National Finals Competition.

The school and students would like to thank Mrs Heather Warren and QAL as QAL has provided chemicals for practice sessions and Mrs Warren has continued to donate her time to help train students during the after-school practice sessions.

Team 1 - 2nd Place
Left to Right = Zoe, Kahla and Kaitlyn

Team 2 – 6th place
Left to Right = Shan, Ksenia and Andrea
Year 11 Science Students Talk About Organ Donation

Seen here is Rockhampton Hospital’s Donation Specialist Nurse, Josephine Reoch with some of the Year 11 science students from Toolooa High School in Gladstone. Josephine has been presenting to Toolooa’s Year 11 Science classes for 5 years now and it is one of her favourite community sessions.

“Science teacher Natasha Read is a great advocate of organ and tissue donation and has been inviting me to speak for many years now. I am always so impressed with the students interest, interaction and fantastic questions. An assignment on Organ Donation is one of the options within the class”, said Josephine.

Some organ donation facts:
- One organ donor can transform the lives of 10 or more people
- Australia is a world leader for successful transplant outcomes
- Around 1 500 people are on the Australian organ transplant waiting lists at any one time
- In 2013, 1 122 Australians received an organ transplant as a result of the generosity of 391 organ donors
- The family of every potential donor will be asked to confirm the donation decision of the deceased before donation can proceed
- 49% of Australians do not know or are not sure of the donation decision of their loved ones

The quality of care for a potential donor at the end of his or her life, and the wishes of their family, is always the foremost consideration of those involved, and is ever compromised by the potential for organ and tissue donation.

Pictured in the photo are:
Brooke Carroll, Madison Wellington, Sarah Lumsden, Alex Honor, Calen Morris, DSN Josephine Reoch, Felisha Lucke, Josie Futon-Smith, Bryeanna Peterman, Katarna Clayton, and (front) Stacey Rohdman.

Interactors assist with Seniors Dinner at PCYC

Nine Interact members gave up their Saturday night to assist the Gladstone South Rotary club with their annual Seniors Dinner. The students, Katie Morgan, Kaitlyn Read, Sarah Lumsden, Lauren Brennan, Jasmyrn Dew, Brad Read, Jasmine Elliott, Nethmini Alahkoon and Kynan Elliott assisted the local Rotary and Rotaract members to serve a three course (+supper) menu to around 200 senior citizens. The efforts displayed by the students was exemplary with many positive comments made throughout the night – especially how good they looked in their new Interact shirts supplied by our supporting South Gladstone Rotary club. The students then entertained the audience by participating in a conga line and hokey pokey dance.

A special thank you must be given to Bruce Hunt (South Gladstone Rotary) and the seniors who attended the evening who in return supported our Toolooa student in their 40 hour Famine fundraising. A bucket was handed around in aid of supporting Jasmine, Nethmini, Brad and Lauren in their fundraising endeavours with a grand total of $482 was donated!!

Thank you to all the seniors in attendance who supported the students.
The Spine Society of Australia is commencing their annual National Self-Detection Program for Scoliosis (NSDP) in July and August. As part of this program all schools in Australia with girls in year 7 & year 9 will be invited to participate by downloading the NSDP brochure for distribution to their pupils. It can be accessed on www.scoliosis-australia.org/scoliosis/self_detection_prog.html

The causes are unknown but 80%-90% of cases occur in otherwise healthy adolescents.

**HOW DO YOU DETECT SCOLIOSIS?**
Simply look for it!

It only takes 30 seconds.

Your can visit the website www.scoliosis-australia.org and get more information on the treatment, diagnosis or fashion or visit the SBYHN (School Based Youth health Nurse) Lani. At the school on Monday, Tuesday and Wednesday Ph 4971 4364.

Yours in health,
School Based Youth Health Nurse
Phone 4971 4364.
Lani Clements

---

**WHAT IS SCOLIOSIS?**
Scoliosis is a lateral or sideways curve of the spine. The spine also rotates on its long axis as it curves. It usually develops during early adolescence (age 10-13 years) when growth is most rapid.

**WHAT IS THE CAUSE OF SCOLIOSIS?**
The cause is unknown, but 80-90% of cases occur in otherwise healthy adolescents. This is called idiopathic (cause unknown) scoliosis.

We know that scoliosis is NOT contagious and NOT caused by bad posture, a soft mattress, carrying a heavy school bag or junk food.

**WHY IS EARLY DETECTION IMPORTANT?**
While very small curves are common and of no significance, about 2% of girls have a curve which warrants medical observation during the growth period. Three girls per 1,000 will require treatment during the growth phase. If treatment is required, the earlier it is undertaken, the better the long-term result. This is the basis for screening since in the early stages scoliosis produces no symptoms. The way to detect scoliosis is to look for it!

**WHAT ARE THE OUTWARD SIGNS OF SCOLIOSIS?**

- Head not centered over body
- Unequal gaps between the arms and the trunk
- One shoulder higher
- One shoulder-blade higher and possibly more prominent
- Spine denvously curved

**WHY THIS BROCHURE HAS BEEN PRODUCED**
This brochure is designed to make parents of schoolgirls aware of the outward signs of scoliosis. From time to time all government and non-government schools in Australia will be asked to download this brochure from www.scoliosis-australia.org and to distribute it to girls in Years 7 and 9 (11 and 13 years of age in most states and territories).
Technology Department News

There still many opportunities for year 10 and 11 students to apply for programs offered by EQIP (Education Queensland & Industry Partnership) for 2015.

The EQIP Engineering Skills Centre has extended their dates for applications until the last day of term 3 (19th September). This two year program will introduce student to an authentic working environment at the NRG Gladstone Power Station Engineering Skills Centre. The will have the opportunity to complete a Certificate I and II in Engineering (Manufacturing) and also an Automotive Studies subject.

For more information visit the EQIP website (eqipgladstone.com.au) and click on APPLY or see Mr Elvery in the Technology Staffroom.

Another program EQIP offers is a Certificate II in Process Plant Operations (EPMA). This is a one year course offered to both year 11 and 12 students in 2015. Working with the Gladstone TAFE students will complete the following core competencies:

- Participate in environmentally sustainable work practices
- Follow emergency response procedures
- Communicate in the workplace
- Work safely

Also 11 elective competencies such as, Working Safely at Heights, Gas test atmospheres, enter confined spaces, read dials and indicators.

For more information visit the EQIP website and click on APPLY. eqipgladstone.com.au or see Mr Elvery in the Technology Staffroom.

Some positive news some senior students in the Technology area, a number of students have been expected for aptitude test at different industries and workplaces around the Gladstone area. This will give them a great opportunity for gaining apprenticeships or fulltime work in the near future. Technology staff would like to congratulate these students and wish them all the best for their future endeavours.

EMERALD AGRICULTURAL COLLEGE
LONGREACH PASTORAL COLLEGE

PROUDLY SUPPORTED BY

COTTON AUSTRALIA
CENTRAL HIGHLANDS COTTON (GROWERS & INDUSTRIES ASSOC)
DARLING DOWNS COTTON GROWERS Inc
S. Kidman & Co Ltd
TASTE – What is it?
TASTE is a program for year 10, 11 and 12 students held at the Emerald Agricultural College, Longreach Pastoral College and Dalby Training Centre during certain school holidays. The four day program is designed to help young people explore the many career options available in rural industry. TASTE gives students an appreciation of the practical skills and innovative technology used across a wide range of agricultural careers.

Here’s what one student commented about TASTE.

“After two days of passing barren country side of Queensland and dodging roos and pigs I was finally there. My week began with practicing cattle drafting, followed by some shearing, wood working, horse riding and one of my favourites, motorbike riding. Coming from the outer suburbs of Brisbane meant that I hadn’t had much exposure to cows, sheep, horses or motorbikes. I thought I would be the only one that came from the suburbs but I wasn’t. That’s why I loved this experience so much because I got to meet people that had the same interests no matter where they came from in Australia.”

What will you do at TASTE?
Throughout the four days of the program you will live and breathe the rural experience in areas such as operating machinery and equipment, riding motorcycles or horses, feeding livestock, exploring the science behind the agriculture, using GPS equipment for locating and plotting your position. If your interest is in horticulture, cropping or making a difference to the environment this program will be perfect. But it isn’t all work! Students will have an opportunity to tour local rural properties, and experience interactive demonstrations. You’ll have heaps of fun along the way with a variety of planned social activities.

Why come to TASTE?
If you’re thinking of a career in rural industry or are thinking of attending one of our colleges, the TASTE experience will allow you to find out what it is really like. You will get hands on experience at our farm scale properties, and meet experienced instructors who are working in the industry. If you want to work with animals, learn how crops are grown, how to operate machinery or manage the environment – Come to TASTE!

Take the time to explore the exciting range of training and career options available to you in agriculture, horticulture and conservation and land management. Experience the training and lifestyle at our residential colleges. TASTE is a great way to explore your options for the future.
