eLearning Vision

At Toolooa State High School we believe that teaching and learning practices that intentionally integrate and embed technology can do more than just enhance learning – they have the power to transform learning.

Our school's goal is for students to use iPads as a tool to support key processes in learning and for teachers to use them as an environment to facilitate deeper engagement in learning and higher-ordering thinking. We request that all students bring a device to school, and the preferred device is an iPad, as part of the booklist.
